

Our touchscreen arrived right before fall break so we were only able to pick it up on the last day of the sprint. As such, for requirement 17, we completed our initial prototype design in Figma. The below image will be the starting screen that the user will be presented with.

At this screen, the user can select the "next tee box" to produce the following screen:

Now that a tee box is selected, the user can press the "Go" button to begin the cart's motion:

While the cart is in motion, the user can see the route that they are currently taking and always has the option to stop the cart through the touchscreen.
